"The progress of humankind has as its principle the practical application of the law of justice, love and charity, and this law is founded on the certainty of the future. Take away that certainty and you take away its cornerstone. All others are derived from this law because it entails all the conditions of human happiness. It alone can heal the afflictions of society, and we can judge this by comparing various eras and peoples, since their conditions improve as this law is better understood and better applied.

In addition, if a partial and incomplete application has produced such a real benefit, what would happen if all social institutions were to take it as their basis? Could that be possible? Yes.

Those who have advanced ten steps can advance twenty, and so on. We can evaluate the future based on the past. We are already seeing that the hostilities among peoples are decreasing little by little; that the barriers separating them fall as they become civilized; that they are joining hands from one end of the world to the other; that more justice is presiding over international laws; that wars are becoming rarer and no longer exclude humane sentiments; that uniformity is being established in relationships; that race and caste distinctions are disappearing and people of different beliefs are silencing their sectarian prejudices so that they may unite in the worship of one and the same God.

Francois Xavier, spirit, in the chapter 12, the Gospel According to Spiritism, item 14, finalise his comments like that: "When charity finally becomes the general rule of conduct for humanity, all acts and words will be confined to this maxim "Do not do to others that which you would not wish done to yourself." When this happens all cause for dissensions will disappear and with this all duels and wars, which are only duels between nations."

The New Generation

In order for people to be happy on the earth it must be populated only by good incarnate and discarnate spirits who desire nothing but the good. Once such a time has come, there will be a great emigration from among those who inhabit the earth.

Those who practice evil for evil's sake, and who are untouched by the sentiment of the good, will no longer be worthy of the transformed planet. They will be banished from it, because their stay would once more cause trouble and confusion and would be an obstacle to progress. Some will expiate their hardness of heart on less evolved worlds. Others will do so among primitive races here on earth, which will be the same as expiating on less evolved worlds.

These will bring with them the knowledge they have acquired and will have the mission of enabling these races to advance. They will be replaced by more-advanced spirits, who will see to it that justice, peace and fraternity reign.

According to the Spirits, the earth will not be transformed by a cataclysm that will suddenly wipe out an entire generation. The current generation will disappear gradually and the new one will follow it in the same way, without there having been any change in the natural order of things.

Consequently, everything will proceed outwardly as usual, but with this single difference - a crucial one: a portion of the spirits who used to incarnate on the earth will no longer do so. Instead of a backward spirit inclined toward evil and who would have incarnated in a child being born, there will be a more advanced spirit with a propensity for the good.

Thus, it does not so much involve a new corporeal generation, but rather a new generation of spirits; this is what Jesus undoubtedly meant when he said, "Verily, verily I say unto you that this generation will not pass away until these events have been fulfilled." Consequently, those who hope to see the transformation occur by means of supernatural and extraordinary effects will be disappointed.

Question 742. **What is the cause that leads humankind to war?**

"The predominance of the animal nature over the spiritual, and the satisfaction of their passions. In the state of barbarity, nations only know the right of the strongest, and that is why war is a normal state for them. As humans evolve, war will become less frequent since they will avoid its causes, and when it does become necessary, they will know how to make it more humane."

Question 743. **Will war someday disappear from the earth?**

"Yes, when men and women understand justice and practice God's law. Then all nations will live as brothers and sisters."
